TIPS: Tape Part I and II together and place it on a pumpkin. Carve the owl, the center of the tree, the moon and the stars first. The lines in this pattern are carved with a single stroke of the blade.

TIPS: Cut each figure out of the pumpkin pieces which were removed while carving Part I and II. Be sure to carve the inside of each design before carving the outline. The lines in this pattern are carved with a single stroke of the blade and the gray areas carved out and removed. Using toothpicks, attach the figures inside the first pumpkin, facing outward. Position your candle behind one of the figures. (Note: if you don't have enough pumpkin to cut out the inside figures, you may need another pumpkin.)
